

**REGULAR MEETING
OF THE
ELMWOOD PARK MAYOR AND COUNCIL
October 15, 2020
7:00P.M.**

1. CALL TO ORDER:

2. PRAYER & FLAG SALUTE:

3. STATEMENT OF COMPLIANCE:

Whereas, Chapter 231 of the Public Laws of the State of New Jersey requires at the commencement of every meeting a Statement of Compliance be read by the presiding officer.

Now, Therefore Be Advised, that the meeting requirements for this meeting have been met by publishing a special meeting notice in The Record and Herald News and by posting such notice in the office of the Borough Clerk as well as in a public place within the Municipal Building, and by notifying interested citizens. Said notice was posted on January 8, 2020. An additional notice reflecting the time change was published on April 21, 2020.

4. APPROVAL OF MINUTES:

September 3, 2020 – Work Session Meeting
September 3, 2020 – Executive Session Meeting
September 10, 2020 – Work Session Meeting
September 10, 2020 – Executive Session Meeting
September 14, 2020 – Executive Session Meeting
September 17, 2020 – Regular Meeting
September 17, 2020 – Executive Session Meeting

5. ORDINANCES:

SECOND READING

R-390-20 Introduce Ord. #20-29

AN ORDINANCE TO AMEND ORDINANCE 20-20 FIXING THE SALARY, WAGE AND COMPENSATION OF THE OFFICERS, EMPLOYEES AND SERVANTS OF THE BOROUGH OF ELMWOOD PARK, COUNTY OF BERGEN, STATE OF NEW JERSEY FOR THE YEAR 2020. MORE SPECIFICALLY SECTION II ADDING A DESIGNATION OF DEPUTY MUNICIPAL CLERK

R-391-20 Introduce Ord. #20-30

AN ORDINANCE TO AMEND CHAPTER XXVI OF THE CODE OF THE BOROUGH OF ELMWOOD PARK ENTITLED STORMWATER CONTROL ORDINANCE

R-392-20 Introduce Ord. #20-31

ORDINANCE OF THE BOROUGH OF ELMWOOD PARK, IN THE COUNTY OF BERGEN, STATE OF NEW JERSEY AMENDING THE BOROUGH CODE MORE SPECIFICALLY CHAPTER XV TO BE REFERRED TO AS THE REDEVELOPMENT AGENCY OF THE BOROUGH OF ELMWOOD PARK

6. CONSENT AGENDA:

- R-393-20 Approval of Payroll
- R-394-20 Approval of Bills List
- R-395-20 Approve Salary Adjustment
- R-396-20 Authorize Current Estimate #3 & Final & Change Order #2 – 2019 Road Program – D & L Paving Contractors, Inc.
- R-397-20 Authorize Current Estimate #1 – Tuella Avenue Water Main Improvements – John Garcia Construction
- R-398-20 Appoint Special Legal Counsel – Biancamano & Distefano, PC.
- R-399-20 Authorize Payment – Recreation Department – MRC Gametime
- R-400-20 Authorize Purchase of Equipment – Bobcat – Department of Public Works
- R-401-20 Authorize Release of Road Opening Performance Bonds
- R-402-20 Approve Elmwood Park Fire Department Stipend Program – 3rd Quarter Compensation
- R-403-20 Authorize Purchase of Equipment – Beyer Ford – Department of Public Works
- R-404-20 Authorizing the Execution of an Agreement with North Jersey Wastewater Cooperative Pricing System
- R-405-20 Authorize Signature of the Borough Attorney and Mayor Declaration of Encumbrance – NJDEP Green Acres – Birchwood Park Improvements
- R-406-20 Approve 2020/2021 New and/or Used Car Dealerships Licenses
- R-407-20 Requesting Permission for the Dedication by Rider for Donations for Veteran’s Memorial Park
- R-408-20 Supporting High Speed Internet Accessibility
- R-409-20 Appointment of Firefighter
- R-410-20 Renew Liquor License for the 2020/2021 License Term
- R-411-20 Approve Fire Department Standby Compensation
- R-412-20 Adopting Revised Personnel Policies and Procedures Manual
- R-413-20 Approve and Accept Execution of Contract – Millennium Strategies
- R-414-20 Resolution to Approve the Consent Agenda

7. DEPARTMENTAL REPORTS:

Planning Board Meeting Minutes – August 5, 2020

8. COUNCIL REPORTS:

9. MAYOR’S REPORT:

10. PUBLIC HEARING:

11. EXECUTIVE SESSION:

12. ADJOURNMENT:

**BOROUGH OF ELMWOOD PARK
BERGEN COUNTY, NEW JERSEY
RESOLUTION R-390-20**

**RESOLUTION BY:
SECONDED BY:**

**INTRODUCE ORDINANCE #20-29
SECOND READING**

WHEREAS, a public notice has been given by the Borough Clerk that an ordinance entitled:

AN ORDINANCE TO AMEND ORDINANCE 20-20 FIXING THE SALARY, WAGE AND COMPENSATION OF THE OFFICERS, EMPLOYEES AND SERVANTS OF THE BOROUGH OF ELMWOOD PARK, COUNTY OF BERGEN, STATE OF NEW JERSEY FOR THE YEAR 2020. MORE SPECIFICALLY SECTION II ADDING A DESIGNATION OF DEPUTY MUNICIPAL CLERK

WHEREAS, said ordinance was introduced and passed at a meeting held on Thursday, September 17, 2020 and that further consideration of this ordinance would be taken up at this meeting; and

WHEREAS, all persons interested in said ordinance were given an opportunity to be heard concerning the same;

NOW THEREFORE BE IT RESOLVED, by the Mayor and Council of the Borough of Elmwood Park, that an ordinance entitled:

AN ORDINANCE TO AMEND ORDINANCE 20-20 FIXING THE SALARY, WAGE AND COMPENSATION OF THE OFFICERS, EMPLOYEES AND SERVANTS OF THE BOROUGH OF ELMWOOD PARK, COUNTY OF BERGEN, STATE OF NEW JERSEY FOR THE YEAR 2020. MORE SPECIFICALLY SECTION II ADDING A DESIGNATION OF DEPUTY MUNICIPAL CLERK

pass on final reading.

APPROVED: October 15, 2020

Robert Colletti, Mayor

ATTEST: _____

**BOROUGH OF ELMWOOD PARK
BERGEN COUNTY, NEW JERSEY
ORDINANCE NO.: 20-29**

AN ORDINANCE TO AMEND ORDINANCE 20-20 FIXING THE SALARY, WAGE AND COMPENSATION OF THE OFFICERS, EMPLOYEES AND SERVANTS OF THE BOROUGH OF ELMWOOD PARK, COUNTY OF BERGEN, STATE OF NEW JERSEY FOR THE YEAR 2020. MORE SPECIFICALLY SECTION II ADDING A DESIGNATION OF DEPUTY MUNICIPAL CLERK

WHEREAS, the Mayor and Council have been made aware of certain adjustments to the designation of positions as well as designation and adjustments to compensation thereof that are not contained or addressed by the Ordinance; and

WHEREAS, the Mayor and Council wish to correct same by including designation of positions together with adjusting and setting forth commensurable salary and or hourly rate for particular employee(s) affected by such inconsistency and maintain a sense of just and fair treatment; and

WHEREAS, the Mayor and Council have acknowledged and determined that said inconsistency should be addressed by way of amended to the ordinance;

NOW THEREFORE BE IT ORDAINED by the Mayor and Council of the Borough of Elmwood Park, County of Bergen, and State of New Jersey that the Salary Ordinance is hereby amended as follows:

SECTION 1: that **SECTION II** entitled “Department Head & Non-Union Employees” more specifically to include a new designation of Deputy Municipal Clerk in the chart under paragraph 1 and that the salary designation shall read as setforth in the White-Collar Union Contract.

SECTION 2: that in the event any section, part or provision of this amended Ordinance shall be held unconstitutional or invalid by any Court, such holding shall not affect the validity of this rest of the amended Ordinance, or any remaining part of this amended Ordinance other than the part held unconstitutional or invalid.

SECTION 3: that all ordinances or parts thereof, which are inconsistent with the provisions of this amendment, are hereby repealed to the extent of their inconsistencies.

SECTION 4: that this amendment to the Ordinance shall take effect immediately upon its final passage and publication as required by law.

WHEREAS, the Mayor and Council have become aware as to the need to revise and amend the existing Stormwater Control Ordinance so as to comply with the State of New Jersey laws, more specifically N.J.S.A. **40:55D-93** which requires every municipality in the State of New Jersey to prepare and enact a storm water control ordinance in order to protect the health, safety and welfare of the residents of the Borough of Elmwood Park.

NOW THEREFORE BE IT ORDAINED by the Mayor and Council of the Borough of Elmwood Park, County of Bergen, and State of New Jersey that the following shall be adopted, and that the existing language in the existing ordinance shall be replaced with the following:

SECTION 26-I. SCOPE AND PURPOSE:

A. Policy Statement

Flood control, groundwater recharge, and pollutant reduction shall be achieved through the use of stormwater management measures, including green infrastructure Best Management Practices (GI BMPs) and nonstructural stormwater management strategies. GI BMPs and low impact

development (LID) should be utilized to meet the goal of maintaining natural hydrology to reduce stormwater runoff volume, reduce erosion, encourage infiltration and groundwater recharge, and reduce pollution. GI BMPs and LID should be developed based upon physical site conditions and the origin, nature and the anticipated quantity, or amount, of potential pollutants. Multiple stormwater management BMPs may be necessary to achieve the established performance standards for water quality, quantity, and groundwater recharge.

B. Purpose

The purpose of this ordinance is to establish minimum stormwater management requirements and controls for “major development,” as defined below in Section 26-2.

C. Applicability

1. This ordinance shall be applicable to the following major developments:
 - a. Non-residential major developments; and
 - b. Aspects of residential major developments that are not pre-empted by the Residential Site Improvement Standards at N.J.A.C. 5:21.
2. This ordinance shall also be applicable to all major developments undertaken by the Borough of Elmwood Park.

D. Compatibility with Other Permit and Ordinance Requirements

Development approvals issued pursuant to this ordinance are to be considered an integral part of development approvals and do not relieve the applicant of the responsibility to secure required permits or approvals for activities regulated by any other applicable code, rule, act, or ordinance. In their interpretation and application, the provisions of this ordinance shall be held to be the minimum requirements for the promotion of the public health, safety, and general welfare.

This ordinance is not intended to interfere with, abrogate, or annul any other ordinances, rule or regulation, statute, or other provision of law except that, where any provision of this ordinance imposes restrictions different from those imposed by any other ordinance, rule or regulation, or other provision of law, the more restrictive provisions or higher standards shall control.

SECTION 26-2. DEFINITIONS:

For the purpose of this ordinance, the following terms, phrases, words, and their derivations shall have the meanings stated herein unless their use in the text of this Chapter clearly demonstrates a different meaning. When not inconsistent with the context, words used in the present tense include the future, words used in the plural number include the singular number, and words used in the singular number include the plural number. The word "shall" is always mandatory and not merely directory. The definitions below are the same as or based on the corresponding definitions in the Stormwater Management Rules at N.J.A.C. 7:8-1.2.

“CAFRA Centers, Cores or Nodes” means those areas with boundaries incorporated by reference or revised by the Department in accordance with N.J.A.C. 7:7-13.16.

“CAFRA Planning Map” means the map used by the Department to identify the location of Coastal Planning Areas, CAFRA centers, CAFRA cores, and CAFRA nodes. The CAFRA Planning Map is available on the Department's Geographic Information System (GIS).

“Community basin” means an infiltration system, sand filter designed to infiltrate, standard constructed wetland, or wet pond, established in accordance with N.J.A.C. 7:8-4.2(c)14, that is designed and constructed in accordance with the New Jersey Stormwater Best Management Practices Manual, or an alternate design, approved in accordance with N.J.A.C. 7:8-5.2(g), for an infiltration system, sand filter designed to infiltrate, standard constructed wetland, or wet pond and that complies with the requirements of this chapter.

“Compaction” means the increase in soil bulk density.

“Contributory drainage area” means the area from which stormwater runoff drains to a stormwater management measure, not including the area of the stormwater management measure itself.

“Core” means a pedestrian-oriented area of commercial and civic uses serving the surrounding municipality, generally including housing and access to public transportation.

“County review agency” means an agency designated by the County Board of Chosen Freeholders to review municipal stormwater management plans and implementing ordinance(s). The county review agency may either be:

1. A county planning agency or
2. A county water resource association created under N.J.S.A 58:16A-55.5, if the ordinance or resolution delegates authority to approve, conditionally approve, or disapprove municipal stormwater management plans and implementing ordinances.

“Department” means the Department of Environmental Protection.

“Designated Center” means a State Development and Redevelopment Plan Center as designated by the State Planning Commission such as urban, regional, town, village, or hamlet.

“Design engineer” means a person professionally qualified and duly licensed in New Jersey to perform engineering services that may include, but not necessarily be limited to, development of project requirements, creation and development of project design and preparation of drawings and specifications.

“Development” means the division of a parcel of land into two or more parcels, the construction, reconstruction, conversion, structural alteration, relocation or enlarge-enlargement of any building or structure, any mining excavation or landfill, and any use or change in the use of any building or other structure, or land or extension of use of land, for which permission is required under the Municipal Land Use Law, N.J.S.A. 40:55D-1 *et seq.*

In the case of development of agricultural land, development means: any activity that requires a State permit, any activity reviewed by the County Agricultural Board (CAB) and the State Agricultural Development Committee (SADC), and municipal review of any activity not exempted by the Right to Farm Act , N.J.S.A 4:1C-1 *et seq.*

“Disturbance” means the placement or reconstruction of impervious surface or motor vehicle surface, or exposure and/or movement of soil or bedrock or clearing, cutting, or removing of vegetation. Milling and repaving is not considered disturbance for the purposes of this definition.

“Drainage area” means a geographic area within which stormwater, sediments, or dissolved materials drain to a particular receiving waterbody or to a particular point along a receiving waterbody.

“Environmentally constrained area” means the following areas where the physical alteration of the land is in some way restricted, either through regulation, easement, deed restriction or ownership such as: wetlands, floodplains, threatened and endangered species sites or designated habitats, and parks and preserves. Habitats of endangered or threatened species are identified using the Department's Landscape Project as approved by the Department's Endangered and Nongame Species Program.

“Environmentally critical area” means an area or feature which is of significant environmental value, including but not limited to: stream corridors, natural heritage priority sites, habitats of endangered or threatened species, large areas of contiguous open space or upland forest, steep slopes, and well head protection and groundwater recharge areas. Habitats of endangered or threatened species are identified using the Department’s Landscape Project as approved by the Department’s Endangered and Nongame Species Program.

“Empowerment Neighborhoods” means neighborhoods designated by the Urban Coordinating Council “in consultation and conjunction with” the New Jersey Redevelopment Authority pursuant to N.J.S.A 55:19-69.

“Erosion” means the detachment and movement of soil or rock fragments by water, wind, ice, or gravity.

“Green infrastructure” means a stormwater management measure that manages stormwater close to its source by:

1. Treating stormwater runoff through infiltration into subsoil;
2. Treating stormwater runoff through filtration by vegetation or soil; or
3. Storing stormwater runoff for reuse.

"HUC 14" or "hydrologic unit code 14" means an area within which water drains to a particular receiving surface water body, also known as a sub watershed, which is identified by a 14-digit hydrologic unit boundary designation, delineated within New Jersey by the United States Geological Survey.

“Impervious surface” means a surface that has been covered with a layer of material so that it is highly resistant to infiltration by water.

“Infiltration” is the process by which water seeps into the soil from precipitation.

“Lead planning agency” means one or more public entities having stormwater management planning authority designated by the regional stormwater management planning committee pursuant to N.J.A.C. 7:8-3.2, that serves as the primary representative of the committee.

“Major development” means an individual “development,” as well as multiple developments that individually or collectively result in:

1. The disturbance of one or more acres of land since February 2, 2004;
2. The creation of one-quarter acre or more of “regulated impervious surface” since February 2, 2004;
3. The creation of one-quarter acre or more of “regulated motor vehicle surface” since the effective date of this ordinance, whichever is; or
4. A combination of 2 and 3 above that totals an area of one-quarter acre or more. The same surface shall not be counted twice when determining if the combination area equals one-quarter acre or more.
5. Major development includes all developments that are part of a common plan of development or sale (for example, phased residential development) that collectively or individually meet any one or more of paragraphs 1, 2, 3, or 4 above. Projects undertaken by any government agency that otherwise meet the definition of “major development” but which do not require approval under the Municipal Land Use Law, N.J.S.A. 40:55D-1 et seq., are also considered “major development.”

“Motor vehicle” means land vehicles propelled other than by muscular power, such as automobiles, motorcycles, autocycles, and low speed vehicles. For the purposes of this definition, motor vehicle does not include farm equipment, snowmobiles, all-terrain vehicles, motorized wheelchairs, go-carts, gas buggies, golf carts, ski-slope grooming machines, or vehicles that run only on rails or tracks.

“Motor vehicle surface” means any pervious or impervious surface that is intended to be used by “motor vehicles” and/or aircraft, and is directly exposed to precipitation including, but not limited to, driveways, parking areas, parking garages, roads, racetracks, and runways.

“Municipality” means any city, borough, town, township, or village.

“New Jersey Stormwater Best Management Practices (BMP) Manual” or “BMP Manual” means the manual maintained by the Department providing, in part, design specifications, removal rates, calculation methods, and soil testing procedures approved by the Department as being capable of contributing to the achievement of the stormwater management standards specified in

this chapter. The BMP Manual is periodically amended by the Department as necessary to provide design specifications on additional best management practices and new information on already included practices reflecting the best available current information regarding the particular practice and the Department's determination as to the ability of that best management practice to contribute to compliance with the standards contained in this chapter. Alternative stormwater management measures, removal rates, or calculation methods may be utilized, subject to any limitations specified in this chapter, provided the design engineer demonstrates to the municipality, in accordance with Section IV.F. of this ordinance and N.J.A.C. 7:8-5.2(g), that the proposed measure and its design will contribute to achievement of the design and performance standards established by this chapter.

“Node” means an area designated by the State Planning Commission concentrating facilities and activities which are not organized in a compact form.

“Nutrient” means a chemical element or compound, such as nitrogen or phosphorus, which is essential to and promotes the development of organisms.

“Person” means any individual, corporation, company, partnership, firm, association, political subdivision of this State and any state, interstate, or Federal agency.

“Pollutant” means any dredged spoil, solid waste, incinerator residue, filter backwash, sewage, garbage, refuse, oil, grease, sewage sludge, munitions, chemical wastes, biological materials, medical wastes, radioactive substance (except those regulated under the Atomic Energy Act of 1954, as amended (42 U.S.C. §§ 2011 *et seq.*)), thermal waste, wrecked or discarded equipment, rock, sand, cellar dirt, industrial, municipal, agricultural, and construction waste or runoff, or other residue discharged directly or indirectly to the land, ground waters or surface waters of the State, or to a domestic treatment works. “Pollutant” includes both hazardous and nonhazardous pollutants.

“Recharge” means the amount of water from precipitation that infiltrates into the ground and is not evapotranspired.

“Regulated impervious surface” means any of the following, alone or in combination:

1. A net increase of impervious surface;
2. The total area of impervious surface collected by a new stormwater conveyance system (for the purpose of this definition, a “new stormwater conveyance system” is a stormwater conveyance system that is constructed where one did not exist immediately prior to its construction or an existing system for which a new discharge location is created);
3. The total area of impervious surface proposed to be newly collected by an existing stormwater conveyance system; and/or
4. The total area of impervious surface collected by an existing stormwater conveyance system where the capacity of that conveyance system is increased.

“Regulated motor vehicle surface” means any of the following, alone or in combination:

1. The total area of motor vehicle surface that is currently receiving water;
2. A net increase in motor vehicle surface; and/or quality treatment either by vegetation or soil, by an existing stormwater management measure, or by treatment at a wastewater treatment plant, where the water quality treatment will be modified or removed.

“Sediment” means solid material, mineral or organic, that is in suspension, is being transported, or has been moved from its site of origin by air, water, or gravity as a product of erosion.

“Site” means the lot or lots upon which a major development is to occur or has occurred.

“Soil” means all unconsolidated mineral and organic material of any origin.

“State Development and Redevelopment Plan Metropolitan Planning Area (PA1)” means an area delineated on the State Plan Policy Map and adopted by the State Planning Commission that is intended to be the focus for much of the State’s future redevelopment and revitalization efforts.

“State Plan Policy Map” is defined as the geographic application of the State Development and Redevelopment Plan’s goals and statewide policies, and the official map of these goals and policies.

“Stormwater” means water resulting from precipitation (including rain and snow) that runs off the land’s surface, is transmitted to the subsurface, or is captured by separate storm sewers or other sewage or drainage facilities or conveyed by snow removal equipment.

“Stormwater management BMP” means an excavation or embankment and related areas designed to retain stormwater runoff. A stormwater management BMP may either be normally dry (that is, a detention basin or infiltration system), retain water in a permanent pool (a retention basin), or be planted mainly with wetland vegetation (most constructed stormwater wetlands).

“Stormwater management measure” means any practice, technology, process, program, or other method intended to control or reduce stormwater runoff and associated pollutants, or to induce or control the infiltration or groundwater recharge of stormwater or to eliminate illicit or illegal non-stormwater discharges into stormwater conveyances.

“Stormwater runoff” means water flow on the surface of the ground or in storm sewers, resulting from precipitation.

“Stormwater management planning agency” means a public body authorized by legislation to prepare stormwater management plans.

“Stormwater management planning area” means the geographic area for which a stormwater management planning agency is authorized to prepare stormwater management plans, or a specific portion of that area identified in a stormwater management plan prepared by that agency.

“Tidal Flood Hazard Area” means a flood hazard area in which the flood elevation resulting from the two-, 10-, or 100-year storm, as applicable, is governed by tidal flooding from the Atlantic Ocean. Flooding in a tidal flood hazard area may be contributed to, or influenced by, stormwater runoff from inland areas, but the depth of flooding generated by the tidal rise and fall of the Atlantic Ocean is greater than flooding from any fluvial sources. In some situations, depending upon the extent of the storm surge from a particular storm event, a flood hazard area may be tidal in the 100-year storm, but fluvial in more frequent storm events.

“Urban Coordinating Council Empowerment Neighborhood” means a neighborhood given priority access to State resources through the New Jersey Redevelopment Authority.

“Urban Enterprise Zones” means a zone designated by the New Jersey Enterprise Zone Authority pursuant to the New Jersey Urban Enterprise Zones Act, N.J.S.A. 52:27H-60 et. seq.

“Urban Redevelopment Area” is defined as previously developed portions of areas:

1. Delineated on the State Plan Policy Map (SPPM) as the Metropolitan Planning Area (PA1), Designated Centers, Cores or Nodes;
2. Designated as CAFRA Centers, Cores or Nodes;
3. Designated as Urban Enterprise Zones; and
4. Designated as Urban Coordinating Council Empowerment Neighborhoods.

“Water control structure” means a structure within, or adjacent to, a water, which intentionally or coincidentally alters the hydraulic capacity, the flood elevation resulting from the two-, 10-, or 100-year storm, flood hazard area limit, and/or floodway limit of the water. Examples of a water control structure may include a bridge, culvert, dam, embankment, ford (if above grade), retaining wall, and weir.

“Waters of the State” means the ocean and its estuaries, all springs, streams, wetlands, and bodies of surface or groundwater, whether natural or artificial, within the boundaries of the State of New Jersey or subject to its jurisdiction.

“Wetlands” or “wetland” means an area that is inundated or saturated by surface water or ground water at a frequency and duration sufficient to support, and that under normal circumstances does support, a prevalence of vegetation typically adapted for life in saturated soil conditions, commonly known as hydrophytic vegetation.

SECTION 26-3. GENERAL STANDARDS.

A. Design and Performance Standards for Stormwater Management Measures

1. Stormwater management measures for major development shall be designed to provide erosion control, groundwater recharge, stormwater runoff quantity control, and stormwater runoff quality treatment as follows:

2. The minimum standards for erosion control are those established under the Soil and Sediment Control Act, N.J.S.A. 4:24-39 et seq., and implementing rules at N.J.A.C. 2:90.

3. The minimum standards for groundwater recharge, stormwater quality, and stormwater runoff quantity shall be met by incorporating green infrastructure.

B. The standards in this ordinance apply only to new major development and are intended to minimize the impact of stormwater runoff on water quality and water quantity in receiving water bodies and maintain groundwater recharge. The standards do not apply to new major development to the extent that alternative design and performance standards are applicable under a regional stormwater management plan or Water Quality Management Plan adopted in accordance with Department rules.

SECTION 26-4. STORMWATER MANAGEMENT REQUIREMENTS FOR MAJOR DEVELOPMENT

A. The development shall incorporate a maintenance plan for the stormwater management measures incorporated into the design of a major development in accordance with Section 26-11.

B. Stormwater management measures shall avoid adverse impacts of concentrated flow on habitat for threatened and endangered species as documented in the Department’s Landscape Project or Natural Heritage Database established under N.J.S.A. 13:1B-15.147 through 15.150, particularly *Helonias bullata* (swamp pink) and/or *Clemmys muhlnebergi* (bog turtle).

C. The following linear development projects are exempt from the groundwater recharge, stormwater runoff quality, and stormwater runoff quantity requirements of Section 26-4f and 26-4g:

1. The construction of an underground utility line provided that the disturbed areas are revegetated upon completion;

2. The construction of an aboveground utility line provided that the existing conditions are maintained to the maximum extent practicable; and

3. The construction of a public pedestrian access, such as a sidewalk or trail with a maximum width of 14 feet, provided that the access is made of permeable material.

D. A waiver from strict compliance from the green infrastructure, groundwater recharge, stormwater runoff quality, and stormwater runoff quantity requirements of Section 26-4f and 26-4g may be obtained for the enlargement of an existing public roadway or railroad; or the construction or enlargement of a public pedestrian access, provided that the following conditions are met:

1. The applicant demonstrates that there is a public need for the project that cannot be accomplished by any other means;

2. The applicant demonstrates through an alternative’s analysis, that through the use of stormwater management measures, the option selected complies with the requirements of Section 26-4f and 26-4g to the maximum extent practicable;

3. The applicant demonstrates that, in order to meet the requirements of Section 26-4f and 26-4g, existing structures currently in use, such as homes and buildings, would need to be condemned; and

4. The applicant demonstrates that it does not own or have other rights to areas, including the potential to obtain through condemnation lands not falling under 26-4-d3 above within the upstream drainage area of the receiving stream, that would provide additional opportunities to mitigate the requirements of Section 26-4f and 26-4g that were not achievable onsite.

E. Tables 1 through 3 below summarize the ability of stormwater best management practices identified and described in the New Jersey Stormwater Best Management Practices Manual to satisfy the green infrastructure, groundwater recharge, stormwater runoff quality and stormwater runoff quantity standards specified in Section 26-4f and 26-4g. When designed in accordance with the most current version of the New Jersey Stormwater Best Management Practices Manual, the stormwater management measures found at N.J.A.C. 7:8-5.2 (f) Tables 5-1, 5-2 and 5-3 and listed below in Tables 1, 2 and 3 are presumed to be capable of providing stormwater controls for the design and performance standards as outlined in the tables below. Upon amendments of the New Jersey Stormwater Best Management Practices to reflect additions or deletions of BMPs meeting these standards, or changes in the presumed performance of BMPs designed in accordance with the New Jersey Stormwater BMP Manual, the Department shall publish in the New Jersey Registers a notice of administrative change revising the applicable table. The most current version of the BMP Manual can be found on the Department's website at: https://njstormwater.org/bmp_manual2.htm.

F. Where the BMP tables in the NJ Stormwater Management Rule are different due to updates or amendments with the tables in this ordinance the BMP Tables in the Stormwater Management rule at N.J.A.C. 7:8-5.2(f) shall take precedence.

G. Table 1 H. Green Infrastructure BMPs for Groundwater Recharge, Stormwater Runoff Quality, and/or Stormwater Runoff Quantity				
Best Management Practice	Stormwater Runoff Quality TSS Removal Rate (percent)	Stormwater Runoff Quantity	Groundwater Recharge	Minimum Separation from Seasonal High Water Table (feet)
Cistern	0	Yes	No	--
Dry Well ^(a)	0	No	Yes	2
Grass Swale	50 or less	No	No	2 ^(e) 1 ^(f)
Green Roof	0	Yes	No	--
Manufactured Treatment Device ^{(a) (g)}	50 or 80	No	No	Dependent upon the device
Pervious Paving System ^(a)	80	Yes	Yes ^(b) No ^(c)	2 ^(b) 1 ^(c)
Small-Scale Bioretention Basin ^(a)	80 or 90	Yes	Yes ^(b) No ^(c)	2 ^(b) 1 ^(c)
Small-Scale Infiltration Basin ^(a)	80	Yes	Yes	2
Small-Scale Sand Filter	80	Yes	Yes	2
Vegetative Filter Strip	60-80	No	No	--

(Notes corresponding to annotations ^(a) through ^(g) are found on Page D-15)

Table 2 Green Infrastructure BMPs for Stormwater Runoff Quantity (or for Groundwater Recharge and/or Stormwater Runoff Quality with a Waiver or Variance from N.J.A.C. 7:8-5.3)				
Best Management Practice	Stormwater Runoff Quality TSS Removal Rate	Stormwater Runoff Quantity	Groundwater Recharge	Minimum Separation from Seasonal High Water Table (feet)
Bioretention System	80 or 90	Yes	Yes ^(b) No ^(c)	2 ^(b) 1 ^(c)
Infiltration Basin	80	Yes	Yes	2
Sand Filter ^(b)	80	Yes	Yes	2
Standard Constructed Wetland	90	Yes	No	N/A
Wet Pond ^(d)	50-90	Yes	No	N/A

Table 3 BMPs for Groundwater Recharge, Stormwater Runoff Quality, and/or Stormwater Runoff Quantity only with a Waiver or Variance from N.J.A.C. 7:8-5.3				
Best Management Practice	Stormwater Runoff Quality TSS Removal Rate	Stormwater Runoff Quantity	Groundwater Recharge	Minimum Separation from Seasonal High Water Table
Blue Roof	0	Yes	No	N/A
Extended Detention Basin	40-60	Yes	No	1
Manufactured Treatment Device ^(h)	50 or 80	No	No	Dependent upon the device
Sand Filter ^(c)	80	Yes	No	1
Subsurface Gravel Wetland	90	No	No	1
Wet Pond	50-90	Yes	No	N/A

Notes to Tables 1, 2, and 3:

(a) subject to the applicable contributory drainage area limitation specified at Section IV.O.2;

- (b) designed to infiltrate into the subsoil;
- (c) designed with underdrains;
- (d) designed to maintain at least a 10-foot wide area of native vegetation along at least 50 percent of the shoreline and to include a stormwater runoff retention component designed to capture stormwater runoff for beneficial reuse, such as irrigation;
- (e) designed with a slope of less than two percent;
- (f) designed with a slope of equal to or greater than two percent;
- (g) manufactured treatment devices that meet the definition of green infrastructure at Section II;
- (h) manufactured treatment devices that do not meet the definition of green infrastructure at Section II.

I. An alternative stormwater management measure, alternative removal rate, and/or alternative method to calculate the removal rate may be used if the design engineer demonstrates the capability of the proposed alternative stormwater management measure and/or the validity of the alternative rate or method to the municipality. A copy of any approved alternative stormwater management measure, alternative removal rate, and/or alternative method to calculate the removal rate shall be provided to the Department in accordance with Section VI.B. Alternative stormwater management measures may be used to satisfy the requirements at Section IV.O only if the measures meet the definition of green infrastructure at Section II. Alternative stormwater management measures that function in a similar manner to a BMP listed at Section O.2 are subject to the contributory drainage area limitation specified at Section O.2 for that similarly functioning BMP. Alternative stormwater management measures approved in accordance with this subsection that do not function in a similar manner to any BMP listed at Section O.2 shall have a contributory drainage area less than or equal to 2.5 acres, except for alternative stormwater management measures that function similarly to cisterns, grass swales, green roofs, standard constructed wetlands, vegetative filter strips, and wet ponds, which are not subject to a contributory drainage area limitation. Alternative measures that function similarly to standard constructed wetlands or wet ponds shall not be used for compliance with the stormwater runoff quality standard unless a variance in accordance with N.J.A.C. 7:8-4.6 or a waiver from strict compliance in accordance with Section IV.D is granted from Section IV.O.

J. Whenever the stormwater management design includes one or more BMPs that will infiltrate stormwater into subsoil, the design engineer shall assess the hydraulic impact on the groundwater table and design the site, so as to avoid adverse hydraulic impacts. Potential adverse hydraulic impacts include, but are not limited to, exacerbating a naturally or seasonally high water table, so as to cause surficial ponding, flooding of basements, or interference with the proper operation of subsurface sewage disposal systems or other subsurface structures within the zone of influence of the groundwater mound, or interference with the proper functioning of the stormwater management measure itself.

K. Design standards for stormwater management measures are as follows:

1. Stormwater management measures shall be designed to take into account the existing site conditions, including, but not limited to, environmentally critical areas; wetlands; flood-prone areas; slopes; depth to seasonal high water table; soil type, permeability, and texture; drainage area and drainage patterns; and the presence of solution-prone carbonate rocks (limestone);
2. Stormwater management measures shall be designed to minimize maintenance, facilitate maintenance and repairs, and ensure proper functioning. Trash racks shall be installed at the intake to the outlet structure, as appropriate, and shall have parallel bars with one inch spacing between the bars to the elevation of the water quality design storm. For elevations higher than the water quality design storm, the parallel bars at the outlet structure shall be spaced no greater than one-third the width of the diameter of the orifice or one-third the width of the weir, with a minimum spacing between bars of one inch and a maximum spacing between bars of six inches. In addition, the design of trash racks must comply with the requirements of Section VIII.C;
3. Stormwater management measures shall be designed, constructed, and installed to be strong, durable, and corrosion resistant. Measures that are consistent with the relevant portions of the Residential Site Improvement Standards at N.J.A.C. 5:21-7.3, 7.4, and 7.5 shall be deemed to meet this requirement;
4. Stormwater management BMPs shall be designed to meet the minimum safety standards for stormwater management BMPs at Section VIII; and
5. The size of the orifice at the intake to the outlet from the stormwater management BMP shall be a minimum of two and one-half inches in diameter.

L. Manufactured treatment devices may be used to meet the requirements of this subchapter, provided the pollutant removal rates are verified by the New Jersey Corporation for Advanced Technology and certified by the Department. Manufactured treatment devices that do not meet the definition of green infrastructure at Section II may be used only under the circumstances described at Section IV.O.4.

M. Any application for a new agricultural development that meets the definition of major development at Section II shall be submitted to the Soil Conservation District for review and approval in accordance with the requirements at Sections IV.O, P, Q and R and any applicable Soil Conservation District guidelines for stormwater runoff quantity and erosion control. For purposes of this subsection, "agricultural development" means land uses normally associated with the production of food, fiber, and livestock for sale. Such uses do not include the development of land for the processing or sale of food and the manufacture of agriculturally related products.

N. If there is more than one drainage area, the groundwater recharge, stormwater runoff quality, and stormwater runoff quantity standards at Section IV.P, Q and R shall be met in each drainage area, unless the runoff from the drainage areas converge onsite and no adverse environmental impact would occur as a result of compliance with any one or more of the individual standards being determined utilizing a weighted average of the results achieved for that individual standard across the affected drainage areas.

O. Any stormwater management measure authorized under the municipal stormwater management plan or ordinance shall be reflected in a deed notice recorded in the *{insert Office of the County Clerk or the registrar of deeds and mortgages of the county in which the development, project, project site, or mitigation area containing the stormwater management measure is located, as appropriate, to the municipality}*. A form of deed notice shall be submitted to the

A form of deed notice shall be submitted to the municipality for approval prior to filing. The deed notice shall contain a description of the stormwater management measure(s) used to meet the green infrastructure, groundwater recharge, stormwater runoff quality, and stormwater runoff quantity standards at Section IV.O, P, Q and R and shall identify the location of the stormwater management measure(s) in NAD 1983 State Plane New Jersey FIPS 2900 US Feet or Latitude and Longitude in decimal degrees. The deed notice shall also reference the maintenance plan required to be recorded upon the deed pursuant to Section X.B.5. Prior to the commencement of construction, proof that the above required deed notice has been filed shall be submitted to the municipality. Proof that the required information has been recorded on the deed shall be in the form of either a copy of the complete recorded document or a receipt from the clerk or other proof of recordation provided by the recording office. However, if the initial proof provided to the municipality is not a copy of the complete recorded document, a copy of the complete recorded document shall be provided to the municipality within 180 calendar days of the authorization granted by the municipality.

P. A stormwater management measure approved under the municipal stormwater management plan or ordinance may be altered or replaced with the approval of the municipality, if the municipality determines that the proposed alteration or replacement meets the design and performance standards pursuant to Section IV of this ordinance and provides the same level of stormwater management as the previously approved stormwater management measure that is being altered or replaced. If an alteration or replacement is approved, a revised deed notice shall be submitted to the municipality for approval and subsequently recorded with the *{insert appropriate Office of the County Clerk or the registrar of deeds and mortgages, as applies}* and shall contain a description and location of the stormwater management measure, as well as reference to the maintenance plan, in accordance with M above. Prior to the commencement of construction, proof that the above required deed notice has been filed shall be submitted to the municipality in accordance with M above.

Q. Green Infrastructure Standards

1. This subsection specifies the types of green infrastructure BMPs that may be used to satisfy the groundwater recharge, stormwater runoff quality, and stormwater runoff quantity standards.

2. To satisfy the groundwater recharge and stormwater runoff quality standards at Section IV.P and Q, the design engineer shall utilize green infrastructure BMPs identified in Table 1 at Section IV.F. and/or an alternative stormwater management measure approved in accordance with Section IV.G. The following green infrastructure BMPs are subject to the following maximum contributory drainage area limitations:

Best Management Practice	Maximum Contributory Drainage Area
Dry Well	1 acre
Manufactured Treatment Device	2.5 acres
Pervious Pavement Systems	Area of additional inflow cannot exceed three times the area occupied by the BMP
Small-scale Bioretention Systems	2.5 acres
Small-scale Infiltration Basin	2.5 acres
Small-scale Sand Filter	2.5 acres

3. To satisfy the stormwater runoff quantity standards at Section IV.R, the design engineer shall utilize BMPs from Table 1 or from Table 2 and/or an alternative stormwater management measure approved in accordance with Section IV.G.

4. If a variance in accordance with N.J.A.C. 7:8-4.6 or a waiver from strict compliance in accordance with Section IV.D is granted from the requirements of this subsection, then BMPs from Table 1, 2, or 3, and/or an alternative stormwater management measure approved in accordance with Section IV.G may be used to meet the groundwater recharge, stormwater runoff quality, and stormwater runoff quantity standards at Section IV.P, Q and R.

5. For separate or combined storm sewer improvement projects, such as sewer separation, undertaken by a government agency or public utility (for example, a sewerage company), the requirements of this subsection shall only apply to areas owned in fee simple by the government agency or utility, and areas within a right-of-way or easement held or controlled by the government agency or utility; the entity shall not be required to obtain additional property or property rights to fully satisfy the requirements of this subsection. Regardless of the amount of area of a separate or combined storm sewer improvement project subject to the green infrastructure requirements of this subsection, each project shall fully comply with the applicable groundwater recharge, stormwater runoff quality control, and stormwater runoff quantity standards at Section IV.P, Q and R, unless the project is granted a waiver from strict compliance in accordance with Section IV.D.

R. Groundwater Recharge Standards

1. This subsection contains the minimum design and performance standards for groundwater recharge as follows:

2. The design engineer shall, using the assumptions and factors for stormwater runoff and groundwater recharge calculations at Section V, either:

- i. Demonstrate through hydrologic and hydraulic analysis that the site and its stormwater management measures maintain 100 percent of the average annual pre-construction groundwater recharge volume for the site; or
- ii. Demonstrate through hydrologic and hydraulic analysis that the increase of stormwater runoff volume from pre-construction to post-construction for the 2-year storm is infiltrated.

3. This groundwater recharge requirement does not apply to projects within the “urban redevelopment area,” or to projects subject to 4 below.

4. The following types of stormwater shall not be recharged:

i. Stormwater from areas of high pollutant loading. High pollutant loading areas are areas in industrial and commercial developments where solvents and/or petroleum products are loaded/unloaded, stored, or applied, areas where pesticides are loaded/unloaded or stored; areas where hazardous materials are expected to be present in greater than “reportable quantities” as defined by the United States Environmental Protection Agency (EPA) at 40 CFR 302.4; areas where recharge would be inconsistent with Department approved remedial action work plan or landfill closure plan and areas with high risks for spills of toxic materials, such as gas stations and vehicle maintenance facilities; and

ii. Industrial stormwater exposed to “source material.” “Source material” means any material(s) or machinery, located at an industrial facility, that is directly or indirectly related to process, manufacturing, or other industrial activities, which could be a source of pollutants in any industrial stormwater discharge to groundwater. Source materials include, but are not limited to, raw materials; intermediate products; final products; waste materials; by-products; industrial machinery and fuels, and lubricants, solvents, and detergents that are related to process, manufacturing, or other industrial activities that are exposed to stormwater.

S. Stormwater Runoff Quality Standards

1. This subsection contains the minimum design and performance standards to control stormwater runoff quality impacts of major development. Stormwater runoff quality standards are applicable when the major development results in an increase of one-quarter acre or more of regulated motor vehicle surface.

2. Stormwater management measures shall be designed to reduce the post-construction load of total suspended solids (TSS) in stormwater runoff generated from the water quality design storm as follows:

i. Eighty percent TSS removal of the anticipated load expressed as an annual average shall be achieved for the stormwater runoff from the net increase of motor vehicle surface.

ii. If the surface is considered regulated motor vehicle surface because the water quality treatment for an area of motor vehicle surface that is currently receiving water quality treatment either by vegetation or soil, by an existing stormwater management measure, or by treatment at a wastewater treatment plant is to be modified or removed, the project shall maintain or increase the existing TSS removal of the anticipated load expressed as an annual average.

3. The requirement to reduce TSS does not apply to any stormwater runoff in a discharge regulated under a numeric effluent limitation for TSS imposed under the New Jersey Pollutant Discharge Elimination System (NJPDES) rules, N.J.A.C. 7:14A, or in a discharge specifically exempt under a NJPDES permit from this requirement. Every major development, including any that discharge into a combined sewer system, shall comply with 2 above, unless the major development is itself subject to a NJPDES permit with a numeric effluent limitation for TSS or the NJPDES permit to which the major development is subject exempts the development from a numeric effluent limitation for TSS.

4. The water quality design storm is 1.25 inches of rainfall in two hours. Water quality calculations shall take into account the distribution of rain from the water quality design storm, as reflected in Table 4, below. The calculation of the volume of runoff may take into account the implementation of stormwater management measures.

Time (Minutes)	Cumulative Rainfall (Inches)	Time (Minutes)	Cumulative Rainfall (Inches)	Time (Minutes)	Cumulative Rainfall (Inches)
1	0.00166	41	0.1728	81	1.0906

37	0.14620	77	1.0636	117	1.2450
38	0.15280	78	1.0704	118	1.2467
39	0.15940	79	1.0772	119	1.2483
40	0.16600	80	1.0840	120	1.2500

5. If more than one BMP in series is necessary to achieve the required 80 percent TSS reduction for a site, the applicant shall utilize the following formula to calculate TSS reduction:

$$R = A + B - (A \times B) / 100,$$

Where

R = total TSS Percent Load Removal from application of both BMPs, and

A = the TSS Percent Removal Rate applicable to the first BMP

B = the TSS Percent Removal Rate applicable to the second BMP.

6. Stormwater management measures shall also be designed to reduce, to the maximum extent feasible, the post-construction nutrient load of the anticipated load from the developed site in stormwater runoff generated from the water quality design storm. In achieving reduction of nutrients to the maximum extent feasible, the design of the site shall include green infrastructure BMPs that optimize nutrient removal while still achieving the performance standards in Section IV.P, Q and R.

7. In accordance with the definition of FW1 at N.J.A.C. 7:9B-1.4, stormwater management measures shall be designed to prevent any increase in stormwater runoff to waters classified as FW1.

8. The Flood Hazard Area Control Act Rules at N.J.A.C. 7:13-4.1(c)1 establish 300-foot riparian zones along Category One waters, as designated in the Surface Water Quality Standards at N.J.A.C. 7:9B, and certain upstream tributaries to Category One waters. A person shall not undertake a major development that is located within or discharges into a 300-foot riparian zone without prior authorization from the Department under N.J.A.C. 7:13.

9. Pursuant to the Flood Hazard Area Control Act Rules at N.J.A.C. 7:13-11.2(j)3.i, runoff from the water quality design storm that is discharged within a 300-foot riparian zone shall be treated in accordance with this subsection to reduce the post-construction load of total suspended solids by 95 percent of the anticipated load from the developed site, expressed as an annual average.

10. This stormwater runoff quality standards do not apply to the construction of one individual single-family dwelling, provided that it is not part of a larger development or subdivision that has received preliminary or final site plan approval prior to December 3, 2018,

and that the motor vehicle surfaces are made of permeable material(s) such as gravel, dirt, and/or shells.

T. Stormwater Runoff Quantity Standards

1. This subsection contains the minimum design and performance standards to control stormwater runoff quantity impacts of major development.

In order to control stormwater runoff quantity impacts, the design engineer shall, using the assumptions and factors for stormwater runoff calculations at Section V, complete one of the following:

- i. Demonstrate through hydrologic and hydraulic analysis that for stormwater leaving the site, post-construction runoff hydrographs for the 2-, 10-, and 100-year storm events do not exceed, at any point in time, the pre-construction runoff hydrographs for the same storm events;
- ii. Demonstrate through hydrologic and hydraulic analysis that there is no increase, as compared to the pre-construction condition, in the peak runoff rates of stormwater leaving the site for the 2-, 10- and 100-year storm events and that the increased volume or change in timing of stormwater runoff will not increase flood damage at or downstream of the site. This analysis shall include the analysis of impacts of existing land uses and projected land uses assuming full development under existing zoning and land use ordinances in the drainage area;
- iii. Design stormwater management measures so that the post-construction peak runoff rates for the 2-, 10- and 100-year storm events are 50, 75 and 80 percent, respectively, of the pre-construction peak runoff rates. The percentages apply only to the post-construction stormwater runoff that is attributable to the portion of the site on which the proposed development or project is to be constructed; or
- iv. In tidal flood hazard areas, stormwater runoff quantity analysis in accordance with 2.i, ii and iii above is required unless the design engineer demonstrates through hydrologic and hydraulic analysis that the increased volume, change in timing, or increased rate of the stormwater runoff, or any combination of the three will not result in additional flood damage below the point of discharge of the major development. No analysis is required if the stormwater is discharged directly into any ocean, bay, inlet, or the reach of any watercourse between its confluence with an ocean, bay, or inlet and downstream of the first water control structure.

2. The stormwater runoff quantity standards shall be applied at the site's boundary to each abutting lot, roadway, watercourse, or receiving storm sewer system.

SECTION 26-5. CALCULATION OF STORMWATER RUNOFF AND GROUNDWATER RECHARGE:

A. Stormwater runoff shall be calculated in accordance with the following:

1. The design engineer shall calculate runoff using one of the following methods:

- i. The USDA Natural Resources Conservation Service (NRCS) methodology, including the NRCS Runoff Equation and Dimensionless Unit Hydrograph, as described in Chapters 7, 9, 10, 15 and 16 Part 630, Hydrology National Engineering Handbook, incorporated herein by reference as amended and supplemented. This methodology is additionally described in *Technical Release 55 - Urban Hydrology for Small Watersheds* (TR-55), dated June 1986, incorporated herein by reference as amended and supplemented. Information regarding the methodology is available from the Natural Resources Conservation Service website at: https://www.nrcs.usda.gov/Internet/FSE_DOCUMENTS/stelprdb1044171.pdf or at United States Department of Agriculture Natural Resources Conservation Service, 220 Davison Avenue, Somerset, New Jersey 08873; or
- ii. The Rational Method for peak flow and the Modified Rational Method for hydrograph computations. The rational and modified rational methods are described in "Appendix A-9 Modified Rational Method" in the Standards for Soil Erosion and Sediment Control in New Jersey, January 2014. This document is available from the State Soil Conservation Committee or any of the Soil Conservation Districts listed at N.J.A.C. 2:90-1.3(a)3. The location, address, and telephone number for each Soil Conservation District is available from the State Soil Conservation Committee, PO Box 330, Trenton, New Jersey 08625. The document is also available at:

<http://www.nj.gov/agriculture/divisions/anr/pdf/2014NJSoilErosionControlStandardsComplete.pdf>.

2. For the purpose of calculating runoff coefficients and groundwater recharge, there is a presumption that the pre-construction condition of a site or portion thereof is a wooded land use with good hydrologic condition. The term “runoff coefficient” applies to both the NRCS methodology above at Section 26-5a1a and the Rational and Modified Rational Methods at Section 26-5a1b. A runoff coefficient or a groundwater recharge land cover for an existing condition may be used on all or a portion of the site if the design engineer verifies that the hydrologic condition has existed on the site or portion of the site for at least five years without interruption prior to the time of application. If more than one land cover has existed on the site during the five years immediately prior to the time of application, the land cover with the lowest runoff potential shall be used for the computations. In addition, there is the presumption that the site is in good hydrologic condition (if the land use type is pasture, lawn, or park), with good cover (if the land use type is woods), or with good hydrologic condition and conservation treatment (if the land use type is cultivation).

3. In computing pre-construction stormwater runoff, the design engineer shall account for all significant land features and structures, such as ponds, wetlands, depressions, hedgerows, or culverts, that may reduce pre-construction stormwater runoff rates and volumes.

4. In computing stormwater runoff from all design storms, the design engineer shall consider the relative stormwater runoff rates and/or volumes of pervious and impervious surfaces separately to accurately compute the rates and volume of stormwater runoff from the site. To calculate runoff from unconnected impervious cover, urban impervious area modifications as described in the NRCS *Technical Release 55 – Urban Hydrology for Small Watersheds* or other methods may be employed.

5. If the invert of the outlet structure of a stormwater management measure is below the flood hazard design flood elevation as defined at N.J.A.C. 7:13, the design engineer shall take into account the effects of tailwater in the design of structural stormwater management measures.

B. Groundwater recharge may be calculated in accordance with the following:

The New Jersey Geological Survey Report GSR-32, A Method for Evaluating Groundwater-Recharge Areas in New Jersey, incorporated herein by reference as amended and supplemented. Information regarding the methodology is available from the New Jersey Stormwater Best Management Practices Manual; at the New Jersey Geological Survey website at:

<https://www.nj.gov/dep/njgs/pricelst/greport/gsr32.pdf>

or at New Jersey Geological and Water Survey, 29 Arctic Parkway, PO Box 420 Mail Code 29-01, Trenton, New Jersey 08625-0420.

SECTION 26-6. SOURCES FOR TECHNICAL GUIDANCE:

A. Technical guidance for stormwater management measures can be found in the documents listed below, which are available to download from the Department’s website at:

http://www.nj.gov/dep/stormwater/bmp_manual2.htm.

1. Guidelines for stormwater management measures are contained in the New Jersey Stormwater Best Management Practices Manual, as amended and supplemented. Information is provided on stormwater management measures such as, but not limited to, those listed in Tables 1, 2, and 3.

2. Additional maintenance guidance is available on the Department’s website at:

https://www.njstormwater.org/maintenance_guidance.htm.

B. Submissions required for review by the Department should be mailed to:

The Division of Water Quality, New Jersey Department of Environmental Protection, Mail Code 401-02B, PO Box 420, Trenton, New Jersey 08625-0420.

SECTION 26-7. SOLIDS AND FLOATABLE MATERIALS CONTROL STANDARDS:

A. Site design features identified under Section IV.F above, or alternative designs in accordance with Section IV.G above, to prevent discharge of trash and debris from drainage systems shall comply with the following standard to control passage of solid and floatable materials through storm drain inlets. For purposes of this paragraph, “solid and floatable materials” means sediment, debris, trash, and other floating, suspended, or settleable solids. For exemptions to this standard see Section VII.A.2 below.

1. Design engineers shall use one of the following grates whenever they use a grate in pavement or another ground surface to collect stormwater from that surface into a storm drain or surface water body under that grate:

- i. The New Jersey Department of Transportation (NJDOT) bicycle safe grate, which is described in Chapter 2.4 of the NJDOT Bicycle Compatible Roadways and Bikeways Planning and Design Guidelines; or
- ii. A different grate, if each individual clear space in that grate has an area of no more than seven (7.0) square inches or is no greater than 0.5 inches across the smallest dimension.

Examples of grates subject to this standard include grates in grate inlets, the grate portion (non-curb-opening portion) of combination inlets, grates on storm sewer manholes, ditch grates, trench grates, and grates of spacer bars in slotted drains. Examples of ground surfaces include surfaces of roads (including bridges), driveways, parking areas, bikeways, plazas, sidewalks, lawns, fields, open channels, and stormwater system floors used to collect stormwater from the surface into a storm drain or surface water body.

- iii. For curb-opening inlets, including curb-opening inlets in combination inlets, the clear space in that curb opening, or each individual clear space if the curb opening has two or more clear spaces, shall have an area of no more than seven (7.0) square inches, or be no greater than two (2.0) inches across the smallest dimension.

2. The standard in A.1. above does not apply:

- i. Where each individual clear space in the curb opening in existing curb-opening inlet does not have an area of more than nine (9.0) square inches;
- ii. Where the municipality agrees that the standards would cause inadequate hydraulic performance that could not practicably be overcome by using additional or larger storm drain inlets;
- iii. Where flows from the water quality design storm as specified in N.J.A.C. 7:8 are conveyed through any device (e.g., end of pipe netting facility, manufactured treatment device, or a catch basin hood) that is designed, at a minimum, to prevent delivery of all solid and floatable materials that could not pass through one of the following:
 - a. A rectangular space four and five-eighths (4.625) inches long and one and one-half (1.5) inches wide (this option does not apply for outfall netting facilities); or
 - b. A bar screen having a bar spacing of 0.5 inches.

Note that these exemptions do not authorize any infringement of requirements in the Residential Site Improvement Standards for bicycle safe grates in new residential development (N.J.A.C. 5:21-4.18(b)2 and 7.4(b)1).

- iv. Where flows are conveyed through a trash rack that has parallel bars with one inch (1 inch) spacing between the bars, to the elevation of the Water Quality Design Storm as specified in N.J.A.C. 7:8; or
- v. Where the New Jersey Department of Environmental Protection determines, pursuant to the New Jersey Register of Historic Places Rules at N.J.A.C. 7:4-7.2(c), that action to meet this standard is an undertaking that constitutes an encroachment or will damage or destroy the New Jersey Register listed historic property.

SECTION 26-8. SAFETY STANDARDS FOR STORMWATER MANAGEMENT BASINS:

A. This section sets forth requirements to protect public safety through the proper design and operation of stormwater management BMPs. This section applies to any new stormwater management BMP.

B. The provisions of this section are not intended to preempt more stringent municipal or county safety requirements for new or existing stormwater management BMPs. Municipal and county stormwater management plans and ordinances may, pursuant to their authority, require existing stormwater management BMPs to be retrofitted to meet one or more of the safety standards in Section VIII.C.1, VIII.C.2, and VIII.C.3 for trash racks, overflow grates, and escape provisions at outlet structures.

C. Requirements for Trash Racks, Overflow Grates and Escape Provisions

1. A trash rack is a device designed to catch trash and debris and prevent the clogging of outlet structures. Trash racks shall be installed at the intake to the outlet from the Stormwater management BMP to ensure proper functioning of the BMP outlets in accordance with the following:

- i. The trash rack shall have parallel bars, with no greater than six-inch spacing between the bars;
- ii. The trash rack shall be designed so as not to adversely affect the hydraulic performance of the outlet pipe or structure;
- iii. The average velocity of flow through a clean trash rack is not to exceed 2.5 feet per second under the full range of stage and discharge. Velocity is to be computed on the basis of the net area of opening through the rack; and
- iv. The trash rack shall be constructed of rigid, durable, and corrosion resistant material and designed to withstand a perpendicular live loading of 300 pounds per square foot.

2. An overflow grate is designed to prevent obstruction of the overflow structure. If an outlet structure has an overflow grate, such grate shall meet the following requirements:

- i. The overflow grate shall be secured to the outlet structure but removable for emergencies and maintenance.
- ii. The overflow grate spacing shall be no less than two inches across the smallest dimension
- iii. The overflow grate shall be constructed and installed to be rigid, durable, and corrosion resistant, and shall be designed to withstand a perpendicular live loading of 300 pounds per square foot.

3. Stormwater management BMPs shall include escape provisions as follows:

- i. If a stormwater management BMP has an outlet structure, escape provisions shall be incorporated in or on the structure. Escape provisions include the installation of permanent ladders, steps, rungs, or other features that provide easily accessible means of egress from stormwater management BMPs. With the prior approval of the municipality pursuant to VIII.C, a free-standing outlet structure may be exempted from this requirement;
- ii. Safety ledges shall be constructed on the slopes of all new stormwater management BMPs having a permanent pool of water deeper than two and one-half feet. Safety ledges shall be comprised of two steps. Each step shall be four to six feet in width. One step shall be located approximately two and one-half feet below the permanent water surface, and the second step shall be located one to one and one-half feet above the permanent water surface. See VIII.E for an illustration of safety ledges in a stormwater management BMP; and
- iii. In new stormwater management BMPs, the maximum interior slope for an earthen dam, embankment, or berm shall not be steeper than three horizontal to one vertical.

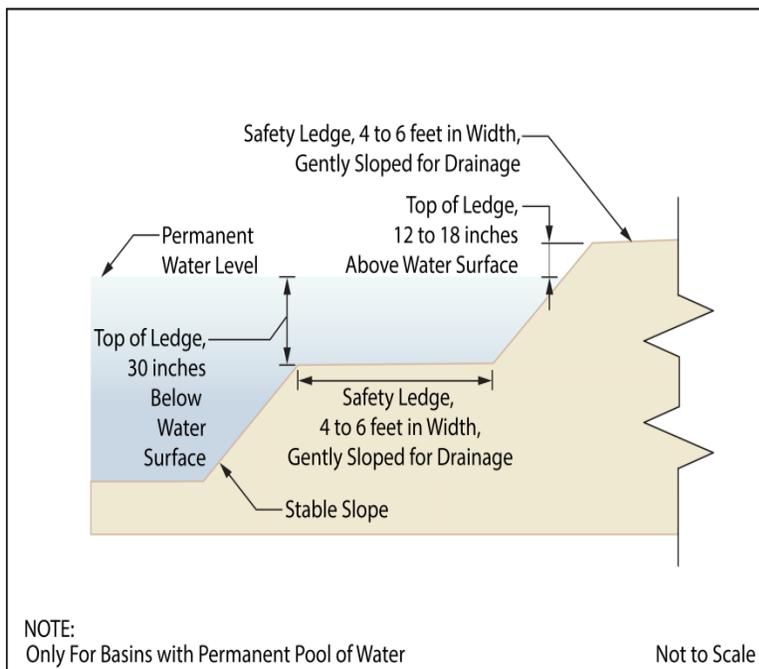

D. Variance or Exemption from Safety Standard

A variance or exemption from the safety standards for stormwater management BMPs may be granted only upon a written finding by the municipality that the variance or exemption will not constitute a threat to public safety.

a threat to public safety.

Elevation View –Basin Safety Ledge Configuration

SECTION 26-9. REQUIREMENTS FOR A SITE DEVELOPMENT STORMWATER PLAN:

A. Submission of Site Development Stormwater Plan

1. Whenever an applicant seeks municipal approval of a development subject to this ordinance, the applicant shall submit all of the required components of the Checklist for the Site Development Stormwater Plan at Section IX.C below as part of the submission of the application for approval.
2. The applicant shall demonstrate that the project meets the standards set forth in this ordinance.
3. The applicant shall submit [*specify number*] copies of the materials listed in the checklist for site development stormwater plans in accordance with Section IX.C of this ordinance.

B. Site Development Stormwater Plan Approval

The applicant's Site Development project shall be reviewed as a part of the review process by the municipal board or official from which municipal approval is sought. That municipal board or official shall consult the municipality's review engineer to determine if all of the checklist requirements have been satisfied and to determine if the project meets the standards set forth in this ordinance.

C. Submission of Site Development Stormwater Plan

The following information shall be required:

1. Topographic Base Map

The reviewing engineer may require upstream tributary drainage system information, as necessary. It is recommended that the topographic base map of the site be submitted which extends a minimum of 200 feet beyond the limits of the proposed development, at a scale of 1"=200' or greater, showing 2-foot contour intervals. The map as appropriate may indicate the following: existing surface water drainage, shorelines, steep slopes, soils, erodible soils, perennial or intermittent streams that drain into or upstream of the Category One waters, wetlands and flood plains along with their appropriate buffer strips, marshlands and other wetlands, pervious or vegetative surfaces, existing man-made structures, roads, bearing and distances of property lines, and significant natural and manmade features not otherwise shown.

2. Environmental Site Analysis

A written and graphic description of the natural and man-made features of the site and its surroundings should be submitted. This description should include a discussion of soil

conditions, slopes, wetlands, waterways, and vegetation on the site. Particular attention should be given to unique, unusual, or environmentally sensitive features and to those that provide particular opportunities or constraints for development.

3. Project Description and Site Plans

A map (or maps) at the scale of the topographical base map indicating the location of existing and proposed buildings roads, parking areas, utilities, structural facilities for stormwater management and sediment control, and other permanent structures. The map(s) shall also clearly show areas where alterations will occur in the natural terrain and cover, including lawns and other landscaping, and seasonal high groundwater elevations. A written description of the site plan and justification for proposed changes in natural conditions shall also be provided.

4. Land Use Planning and Source Control Plan

This plan shall provide a demonstration of how the goals and standards of Sections III through V are being met. The focus of this plan shall be to describe how the site is being developed to meet the objective of controlling groundwater recharge, stormwater quality and stormwater quantity problems at the source by land management and source controls whenever possible.

5. Stormwater Management Facilities Map

The following information, illustrated on a map of the same scale as the topographic base map, shall be included:

- i. Total area to be disturbed, paved, or built upon, proposed surface contours, land area to be occupied by the stormwater management facilities and the type of vegetation thereon, and details of the proposed plan to control and dispose of stormwater.
- ii. Details of all stormwater management facility designs, during and after construction, including discharge provisions, discharge capacity for each outlet at different levels of detention and emergency spillway provisions with maximum discharge capacity of each spillway.

6. Calculations

- i. Comprehensive hydrologic and hydraulic design calculations for the pre-development and post-development conditions for the design storms specified in Section IV of this ordinance.
- ii. When the proposed stormwater management control measures depend on the hydrologic properties of soils or require certain separation from the seasonal high-water table, then a soils report shall be submitted. The soils report shall be based on onsite boring logs or soil pit profiles. The number and location of required soil borings or soil pits shall be determined based on what is needed to determine the suitability and distribution of soils present at the location of the control measure.

7. Maintenance and Repair Plan

The design and planning of the stormwater management facility shall meet the maintenance requirements of Section X.

8. Waiver from Submission Requirements

The municipal official or board reviewing an application under this ordinance may, in consultation with the municipality's review engineer, waive submission of any of the requirements in Section IX.C.1 through IX.C.6 of this ordinance when it can be demonstrated that the information requested is impossible to obtain or it would create a hardship on the applicant to obtain and its absence will not materially affect the review process.

SECTION 26-10. MAINTENANCE AND REPAIR:

A. Applicability

Projects subject to review as in Section I.C of this ordinance shall comply with the requirements of Section X.B and X.C.

B. General Maintenance

1. The design engineer shall prepare a maintenance plan for the stormwater management measures incorporated into the design of a major development.

2. The maintenance plan shall contain specific preventative maintenance tasks and schedules; cost estimates, including estimated cost of sediment, debris, or trash removal; and the name, address, and telephone number of the person or persons responsible for preventative and corrective maintenance (including replacement). The plan shall contain information on BMP location, design, ownership, maintenance tasks and frequencies, and other details as specified in Chapter 8 of the NJ BMP Manual, as well as the tasks specific to the type of BMP, as described in the applicable chapter containing design specifics.

3. If the maintenance plan identifies a person other than the property owner (for example, a developer, a public agency or homeowners' association) as having the responsibility for maintenance, the plan shall include documentation of such person's or entity's agreement to assume this responsibility, or of the owner's obligation to dedicate a stormwater management facility to such person under an applicable ordinance or regulation.

4. Responsibility for maintenance shall not be assigned or transferred to the owner or tenant of an individual property in a residential development or project unless such owner or tenant owns or leases the entire residential development or project. The individual property owner may be assigned incidental tasks, such as weeding of a green infrastructure BMP, provided the individual agrees to assume these tasks; however, the individual cannot be legally responsible for all of the maintenance required.

5. If the party responsible for maintenance identified under Section X.B.3 above is not a public agency, the maintenance plan and any future revisions based on Section X.B.7 below shall be recorded upon the deed of record for each property on which the maintenance described in the maintenance plan must be undertaken.

Preventative and corrective maintenance shall be performed to maintain the functional parameters (storage volume, infiltration rates, inflow/outflow capacity, etc.) of the stormwater management measure, including, but not limited to, repairs or replacement to the structure; removal of sediment, debris, or trash; restoration of eroded areas; snow and ice removal; fence repair or replacement; restoration of vegetation; and repair or replacement of non-vegetated linings.

6. The party responsible for maintenance identified under Section X.B.3 above shall perform all of the following requirements:

- i. maintain a detailed log of all preventative and corrective maintenance for the structural stormwater management measures incorporated into the design of the development, including a record of all inspections and copies of all maintenance-related work orders;
- ii. evaluate the effectiveness of the maintenance plan at least once per year and adjust the plan and the deed as needed; and
- iii. retain and make available, upon request by any public entity with administrative, health, environmental, or safety authority over the site, the maintenance plan and the documentation required by Section X.B.6 and B.7 above.

7. The requirements of Section X.B.3 and B.4 do not apply to stormwater management facilities that are dedicated to and accepted by the municipality or another governmental agency, subject to all applicable municipal stormwater general permit conditions, as issued by the Department.

Note: It may be appropriate to delete requirements in the maintenance and repair plan that are not applicable if the ordinance requires the facility to be dedicated to the municipality. If the municipality does not want to take this responsibility, the ordinance should require the posting of a two-year maintenance guarantee in accordance with N.J.S.A. 40:55D-53. Maintenance and inspection guidance can be found on the Department's website at:

https://www.njstormwater.org/maintenance_guidance.htm.

8. In the event that the stormwater management facility becomes a danger to public safety or public health, or if it is in need of maintenance or repair, the municipality shall so notify the responsible person in writing. Upon receipt of that notice, the responsible person shall have fourteen (14) days to effect maintenance and repair of the facility in a manner that is approved by the municipal engineer or his designee. The municipality, in its discretion, may extend the time allowed for effecting maintenance and repair for good cause. If the responsible person fails or refuses to perform such maintenance and repair, the municipality or County may immediately proceed to do so and shall bill the cost thereof to the responsible person. Nonpayment of such bill may result in a lien on the property.

C. Nothing in this subsection shall preclude the municipality in which the major development is located from requiring the posting of a performance or maintenance guarantee in accordance with N.J.S.A. 40:55D-53

SECTION 26-12. PENALTIES:

Any person(s) who erects, constructs, alters, repairs, converts, maintains, or uses any building, structure or land in violation of this ordinance shall be subject to the following penalties: A fine not to exceed \$500 per day for the first offense and a fine not to exceed \$1,000 per day with the possibility of imprisonment for the second and subsequent offenses.

SECTION 26-14. SEVERABILITY:

If any section, subsection, sentence, clause and phrase or word of this Ordinance is declared to be an independent section, subsection, sentence, clause and phrase, and word the finding or holding of any such portion of this Ordinance to be unconstitutional, void, or ineffective for any cause, or reason, shall not affect any other portion of this Ordinance.

SECTION 2-13. EFFECTIVE DATE:

This Ordinance shall be in full force and effect from September 1, 2020 and shall remain in full force and effect until it is amended or modified or rescinded by the Borough of Elmwood Park, Bergen County, New Jersey

**BOROUGH OF ELMWOOD PARK
BERGEN COUNTY, NEW JERSEY
ORDINANCE NO.: 20-31**

ORDINANCE OF THE BOROUGH OF ELMWOOD PARK, IN THE COUNTY OF BERGEN, STATE OF NEW JERSEY AMENDING THE BOROUGH CODE MORE SPECIFICALLY CHAPTER XV TO BE REFERRED TO AS THE REDEVELOPMENT AGENCY OF THE BOROUGH OF ELMWOOD PARK

WHEREAS, the Borough of Elmwood Park, in the County of Bergen New Jersey (the "Borough") seeks to stimulate and encourage the development and growth of a varied mixture of appropriate economic activities within its borders so as to increase available services, create additional employment, expand the municipal tax base, improve and upgrade unused or inappropriately used properties and to provide for greater financial and economic stability in the future for the Borough and its citizens; and

WHEREAS, aside from such general and specific promotional efforts as may be undertaken, the Borough recognizes that there are various parcels of property located within its boundaries that may be suitable for development, redevelopment and rehabilitation in a manner contemplated by the Local Redevelopment and Housing Law, N.J.S.A. 40:12A-1 et seq. (the "Redevelopment Law"); and

WHEREAS, the Mayor and Borough Council have determined that the issues and concerns relative to general economic development and encouragement and the development and redevelopment of areas which may be deemed to be in need of redevelopment or rehabilitation pursuant to the Redevelopment Law, can best be achieved and resolved through the uniform and coordinated efforts of a dedicated municipal agency established for such sole purposes; and

WHEREAS, in order to address such matters and undertake such efforts, the Borough believes it is in the best interests of the citizens and inhabitants of the Borough, and therefore, the Borough desires to create a body corporate and politic to be known as the "Elmwood Park Redevelopment Agency" (hereinafter the "Agency") to serve as the primary municipal agency for the encouragement, promotion and coordination of appropriate economic activities and growth within the Borough and as the redevelopment entity which shall be responsible for the clearance, replanning, development and redevelopment of such redevelopment or rehabilitation areas for redevelopment plans that presently exist or may hereafter be adopted pursuant to the Redevelopment Law; and

WHEREAS, the Local Finance Board, in the Division of Local Government Services, Department of Community Affairs, State of New Jersey, has prior to the date of introduction of this Ordinance, has been notified and, by letter confirmation dated August 31, 2020 has approved withing the statutory requirement, the creation of the Agency pursuant to N.J.S.A. 40A:5A-4.

NOW, THEREFORE, BE IT ORDAINED by the Borough Council of the Borough of Elmwood Park, in the County of Bergen, New Jersey, That Chapter 15 of the Borough Code shall be referred to as follows:

CHAPTER 15 Redevelopment Agency

Section 15-1. Creation.

Pursuant to the provisions of the Redevelopment Laws of the State of New Jersey, the Borough hereby creates a body corporate and politic to be known as the "Elmwood Park Redevelopment Agency". Such Agency is and shall be an agency and instrumentality of the Borough created by ordinance duly adopted by the Borough Council, and is a "redevelopment agency" as contemplated and provided for by the Redevelopment Law of the State of New Jersey and shall have and exercise all of the powers and perform all of the duties provided for by said Redevelopment Law and any other statutes heretofore or hereafter enacted and applicable thereto.

Section 16-2. Designation of Borough Council as the Agency

Pursuant to the Redevelopment Laws of the State of New Jersey. The Borough Council of the Borough of Elmwood Park is hereby designated as the Redevelopment Agency for the Borough of Elmwood Park pursuant to the Redevelopment Agencies Law, P.L. 1949, c. 306 (N.J.S.A. 40:55C-1 et seq.), as amended and supplemented.

Section 16-3. Powers.

Specific power as are specifically granted to the Agency pursuant to the Redevelopment Law, and as may otherwise be generally allowed pursuant to other applicable New Jersey statutes, the Agency shall also have the power to:

- (i) Execute plans and projects, as provided by applicable law;
- (ii) Inquire into, survey, and publicize the extent, advantages and utility of vacant land and other dormant and underutilized properties of the Borough;
- (iii) Classify such land and properties according to its adaptability for the establishment and development thereon of various types of economic activities;
- (iv) Generally, engage in marketing activities to promote the Borough and its assets as a community, for the purpose of attracting desirable redevelopment;
- (v) Study and analyze business trends, requirements, and developments to ascertain the opportunities for "smart growth" and economic expansion in the Borough;
- (vi) Advertise the business advantages and opportunities and the availability of suitable sites and facilities in the Borough and otherwise initiate and pursue appropriate efforts to encourage and accomplish economic development within the Borough;
- (vii) Cooperate with other Borough departments, agencies, committees, and local civic organizations to promote, encourage, and assist economic development within the Borough;
- (viii) Arrange for the sale or lease of the Borough's vacant lands to businesses whose location thereon is best calculated, in the judgment of the Agency, to advance the interests of the Borough and of its citizens, all in accordance with plans as approved by the Borough; and
- (ix) Exercise such other powers as may be reasonably necessary and appropriate to accomplish its purposes and goals in accordance with New Jersey statutes and Borough ordinances.

Section 16-4. The powers of the Borough Council.

The Borough Council shall perform its legislative functions relating to redevelopment in the Borough of Elmwood Park shall, in addition to those powers set forth in N.J.S.A. 40:55C-12, include but not be limited to the following:

- A. To transfer land owned or acquired in a designated redevelopment area to any person or entity at its fair value as determined by Borough Council, for the uses and in accordance with the purposes specified in the redevelopment plan applicable to said area and pursuant to law.
- B. To make, review, modify and approve contracts with and/or plans of registered architects, licensed professional engineers and/or planners for the implementation of any redevelopment plan or project.
- C. To make, review, modify and/or approve contracts with public agencies or private enterprises or redevelopers and to provide, as part of any such contract, for the extension of credit or making of loans to redevelopers for the financing of any redevelopment work.
- D. To make, review, modify and/or approve contracts with private parties or public agencies for the opening, grading, improvement or closing of streets, roads, roadways, sidewalks, alleys or other places or the acquisition by the borough or other public agencies of property rights or options, including contracts for the furnishing of property or services in connection with the redevelopment plan.
- E. To make, review, modify and approve contracts with public agencies, to the extent and within the scope of the agencies' functions to cause the services customarily provided by said agencies to be rendered for the benefit of the residents of the redevelopment area, and to have such agencies provide and maintain related municipal facilities adjacent to or in connection with the redevelopment area.
- F. To conduct examinations and investigations, including the powers to hear testimony and take proof under oath at public or private hearing of any material matter, require attendance of witnesses and the production of books and papers, take affidavits and issue commissions for the examination of witnesses who are out-of-state, unable to attend or excused from attendance.

Section 16-5. Quorum.

Four (4) Council members shall constitute a quorum for the purpose of conducting business and exercising powers and all other purposes.

1. Action may be taken by the upon the affirmative vote of the majority, but not less than four (4) of the Council Members present, unless any by-laws adopted by the Council shall require a larger or lesser number.
2. The Mayor shall be the chairman and the Council President shall be vice-chairman.
3. The Council shall employ an executive director, who shall be its secretary.
4. The Council shall adopt such by-laws as it deems necessary and appropriate for the conduct of business.

Section 16-6. Powers of Mayor and Council President.

The powers of the Mayor and the Council President in the performance of his/her and executive functions relating to the redevelopment of the Borough of Elmwood Park shall include, but not be limited to, the following:

- A. To enforce the laws and ordinances applicable in the municipality as they affect the redevelopment project.
- B. To report to the public on the status and progress of the redevelopment project and on such applicable conditions and requirements of any nature as may bear upon the continuing redevelopment activities of the project.
- C. To make such recommendations for action by the Borough Council as may be deemed to be in the public interest.
- D. To supervise all activities of the departments of the municipal government as said activities bear upon the functions and activities of the redevelopment project.
- F. To require each department of the municipal government to prepare and submit reports with regard to those activities of any redevelopment project.
- G. To exercise those powers afforded by law to attend meetings of the Borough Council and take part in Borough Council conferences as such meetings and conferences relate to the redevelopment project.
- H. To supervise the Redevelopment Officer in accordance with the Administrative Code.
- I. To establish the redevelopment policy for the municipality.
- J. To supervise the selection of redevelopers in accordance with the regulations established by the Borough Council and to recommend redevelopers for approval by the Borough Council.
- K. To review contracts with redevelopers and contracts for professional services and to refer said contracts to the Borough Council for approval.
- L. To undertake any and all additional activities necessary or proper to carry out his/her powers and functions.

Section 16-7. Office of Redevelopment; Manager.

The Borough Council may, but shall not be required to, establish an Office of Redevelopment. Such office shall be managed by a person appointed by the Mayor and confirmed by the Borough Council. The Redevelopment Manager shall be assisted by staff or consultants to the extent required. The Redevelopment Manager may be an existing borough employee who is assigned the redevelopment responsibilities.

Section 16-8. Duties of Redevelopment Manager.

Subject to applicable laws and ordinances, the Redevelopment Manager shall exercise the following powers and duties under the supervision of the Mayor and Council or:

- A. To be the executive officer in charge of redevelopment activities, including the preparation and modification of the redevelopment plan required by N.J.S.A. 40:55C-1 et seq.
- B. To have full charge and management of the Redevelopment Office and of the employees and consultants in said Office.
- C. To keep accurate records of books of account of all redevelopment transactions.
- D. To prepare budget recommendations for the Redevelopment Office.
- E. To have full charge and management of the redevelopment properties and equipment.
- F. To prepare and present to the Mayor short and long-range planning recommendations for the improvement of redevelopment activities.

G. To coordinate redevelopment activities with the work of other departments and officers of the Borough of Elmwood Park.

H. To keep the Mayor and Borough Council apprised of the redevelopment activities of the municipality and to coordinate the activities of redevelopment planners and consultants and to establish progress schedules of redevelopment activity.

I. To prepare written reports of all redevelopment activities of the Borough of Elmwood Park undertaken with regard to any redevelopment project during the relevant period. Said reports shall be reviewed by the Mayor and shall be provided to the Borough Council on or before the final day of each month. Said reports shall adequately summarize and describe the redevelopment activities undertaken and shall include a discussion of recommended future actions under consideration. The reports shall also describe activities relating to present or future tenants of the redevelopment area and activities undertaken with any other authority, board or agency relating to the redevelopment project.

Section 16-9. Limitation on member interest.

No member or employee of the Agency shall acquire any interest, direct or indirect, in a redevelopment project or in any property included or planned to be included in a project, nor shall he have any interest, direct or indirect, in any contract or proposed contract for materials and services to be furnished or used in connection with a project. If any member or employee of the Agency owns or controls an interest, direct or indirect, in any property included or planned to be included in a project, he or she shall immediately disclose the same in writing to the Agency and the disclosure shall be entered upon the minutes of the Agency. Failure so to disclose such an interest shall constitute misconduct in office. A member or employee required by this Section to make a disclosure shall not participate in any action by the Agency affecting the property with respect to which disclosure is required.

Section 16-10. Inefficiency or neglect of duty or misconduct.

For inefficiency or neglect of duty or misconduct office a member of the agency may be removed by the Council; but may only be removed after he or she has been given a copy of the charges at least ten (10) days prior to the hearing thereon and has had the opportunity to be heard in person or by counsel. In the event of a removal of a member, a record of the proceedings, together with the charges and findings thereon, shall be filed in the office of the Borough Clerk.

IT IS FURTHER ORDAINED by the Borough Council of the Borough of Elmwood Park, in the County of Bergen, New Jersey, as follows:

Section 1. That Copies Certified by the Borough Clerk shall be filed in the office of the Division of Local Government Services of the Department of Community Affairs of the State of New Jersey, after the effective date of this Ordinance.

Section 2. Amended, superseded, or repealed.

Any ordinance of the Borough adopted prior to the date of adoption of this Ordinance that is inconsistent herewith is hereby amended, superseded, or repealed, as applicable, to the extent of any such inconsistency.

Section 3. effect. This Ordinance shall take effect in accordance with applicable law.

Section 4: Effective Date. This Ordinance shall take effect immediately upon final passage and publication thereof as provide by law.

**BOROUGH OF ELMWOOD PARK
BERGEN COUNTY, NEW JERSEY
RESOLUTION R-395-20**

CONSENT AGENDA

**RESOLUTION BY:
SECONDED BY:**

APPROVE SALARY ADJUSTMENT

WHEREAS, Deborah Zafonte was previously appointed as the Borough's Court Administrator; and

WHEREAS, the Mayor and Council agreed to the following salary increases for Ms. Zafonte, separate and distinct from the annual salary ordinance:

January 1, 2020: \$5,000
January 1, 2021: \$4,000
January 1, 2022: \$3,000

NOW THEREFORE BE IT RESOLVED, by the Mayor and Council of the Borough of Elmwood Park, that the following increases be and are hereby approved.

I, Roy Riggitano, Chief Financial Officer for the Borough of Elmwood Park do hereby confirm that there are sufficient funds available for this resolution.

**BOROUGH OF ELMWOOD PARK
BERGEN COUNTY, NEW JERSEY
RESOLUTION R-403-20**

CONSENT AGENDA

**RESOLUTION BY:
SECONDED BY:**

**AUTHORIZE PURCHASE OF VEHICLE
BEYER FORD
DEPARTMENT OF PUBLIC WORKS**

WHEREAS, the Department of Public Works has requested to purchase (1) 2020 Ford F-250 vehicle using funding from Bond Ordinance 20-27 (A); and

WHEREAS, said vehicle is to be purchased through the State of New Jersey Contract #A88727 at a total cost of \$38,843.50 with Beyer Ford located in Morristown, New Jersey;

NOW THEREFORE BE IT RESOLVED, by the Mayor and Council of the Borough of Elmwood Park, County of Bergen, State of New Jersey that they hereby authorize the purchase of (1) 2020 Ford F-250 vehicle totaling \$38,843.50 with Beyer Ford.

I, Roy Riggitano, Chief Financial Officer for the Borough of Elmwood Park do hereby confirm that there are sufficient funds available for this resolution.

**BOROUGH OF ELMWOOD PARK
BERGEN COUNTY, NEW JERSEY
RESOLUTION R-408-20**

CONSENT AGENDA

RESOLUTION BY:
SECONDED BY:

SUPPORTING HIGH SPEED INTERNET ACCESSIBILITY

WHEREAS, rural areas of the State of New Jersey are serviced by service providers with respect to aerial line high-speed internet service; and

WHEREAS, having access to aerial line high-speed internet service is a necessary and vital part of living in today's society; and

WHEREAS, the recent pandemic of COVID-19 further illustrates just how vital access to aerial line high-speed internet has become to society, especially during times of crisis or emergencies and how not having access to aerial line high-speed internet has the potential to cripple a community, particularly a rural one, denying the community the capacity for remote student learning and remote working arrangements with a resident's employer; and

FURTHERMORE, during a time of crisis not having access to aerial line high-speed internet has the potential to shut down all functions of government by denying essential employees and elected officials the ability to work, communicate, distribute information, conduct meetings, and perform the other requirements of a functioning government through remote capabilities; and

WHEREAS, the Borough of Elmwood Park believes that the service providers of aerial line high-speed internet in the State of New Jersey are more than capable of and financially sound enough to achieve a 100% rate of aerial line high-speed internet accessibility but choose not to pursue that goal unless forced to through regulation because the providers feel it is not profitable; and

WHEREAS, not having access to aerial line high-speed internet service is a plight on students, reducing their educational opportunities and ability to learn in a modern world; and

WHEREAS, not having access to aerial line high-speed internet service could potentially have life and death consequences for the elderly or those with various health complications; and

WHEREAS, not having access to aerial line high-speed internet service causes a great burden to businesses, places them at a disadvantage, and reduces chances for economic development in rural areas; and

WHEREAS, not having access to aerial line high-speed internet service can cause rural healthcare facilities to shut down because they cannot access required networks to function, thereby further creating negative impacts on New Jersey residents' health; and

WHEREAS, the Borough of Elmwood Park is desirous of assisting and cooperating with other public entities and State officials to pursue a petition before the Board of Public Utilities to enact regulations requiring a 100% rate of aerial line high-speed internet accessibility in each individual municipality throughout the State of New Jersey; and

WHEREAS, unless the Board of Public Utilities requires service providers of aerial line high-speed internet to provide 100% aerial line high-speed internet access in all municipalities throughout New Jersey, the State will have unintentionally subverted the public's significant investment in the Highlands Preservation Zones, farmland, and open space preservation by not allowing those areas' businesses to be economically competitive and viable over the long term.

NOW, THEREFORE, BE IT RESOLVED by the Borough Council of the Borough of Elmwood Park, County of Bergen, State of New Jersey that the Board of Public Utilities is requested to order all service providers of aerial line high-speed internet to provide aerial line high-speed internet service to all municipalities throughout the State with each municipality being afforded a 100% rate of high-speed internet accessibility; and

BE IT FURTHER RESOLVED, that our State representatives use their authority to require service providers of aerial line high-speed internet to achieve a 100% rate of high-speed internet access for each individual municipality throughout the State of New Jersey; and

BE IT FURTHER RESOLVED, that the Municipal Clerk for the Borough of Elmwood Park be directed to send a copy of this resolution to the Governor of the State of New Jersey, the Senate President of the New Jersey State Senate, the Speaker of the Assembly of the State of New Jersey, the Bergen County Board of Chosen Freeholders, and the Board of Public Utilities.
